DETAILED ACTION

Response to Amendment

1. The amendment filed on 12/23/03 has been entered.

Response to Arguments

2. Applicant's arguments filed 12/23/03 have been fully considered but they are not persuasive.

At page 6 second paragraph applicant admits to have amended the claims to be broader.

In the paragraph spanning pages 6 and 7 applicant recites limitations found in claims 1, 8 and 9.

In the first full paragraph on page 7 applicant contends Hidaka does not disclose at least the feature of generating a first conversion condition from stored conversion data for light sources having high and low color rendering properties. In the following paragraph applicant advances a reason in support of applications contention. Applicant alleges the measured ambient light values and the monitor white signal values do not seem to disclose conversion data having high and low color rendering properties. However, it should be noted that ambient sunlight has a high color rendering property while in comparison the monitor has a lower color rendering property. This position by the examiner is supported by Hidaka at page 10 lines 22-47. Therefore, Hidaka, does teach the argued conversion data having high and low color rendering properties.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 1, 3-9 and 19 are rejected under 35 U.S.C. 102(a) as being anticipated by Yumiko Hidaka, EP 0 767 445 A2, published on April 09, 1997. The grounds of this rejection is incorporated by reference, see pages 3-5 of paper no. 31. The only amendments made to the claims occur in claims 1, 8 and 9 where color temperature has been replaced by white. At page 6 second paragraph applicant admits this amendment makes the claims be broader. Hidaka teaches using the white value of the second illuminating light at page 8 lines 10-15 and 32-40.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
